

C-SERIES: C6 | C7 | C12

Adelaide (SA)

15 to 20 May (6 days)

Overview

The **Australasian Corrosion Association** (ACA) is partnering with **BlastOne** to offer the new and improved **AMPP** complete suite of three coating application certificates in Australia: **C6**, **C7** and **C12** - the C-Series training.

The course will offer a six-day theoretical and practical course that will deliver established **marine and industrial coating applicators** with three certificates.

The C-Series training allows people to get an **internationally recognised certification** to work in specific fields and is designed for people wanting to build skills, be certified and be recognised by their experience.

Who should attend

Coating applicators, painters, contractor personnel, sprayers.

Course structure

C6

- ✓ Hand and Power tool surface preparation
 - ✓ Brush and roller coating application, in accordance with good paint practice
- Pre-requisites:** Proof of a minimum of 150 documented hours experience in hand and power tool surface, preparation, brush and roller coating application.

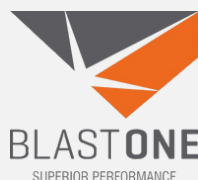

C7

- ✓ Blast cleaning of steel and nonferrous surfaces
 - ✓ Surface preparation, cleanliness, profile, dust and debris control, and abrasives.
- Pre-requisites:** none.

C12

- ✓ Skills assessment of sprayers.
 - ✓ Training and certification of marine and industrial applicators
 - ✓ Operation of airless/conventional spray equipment.
- Pre-requisites:** Proof of a minimum of 800 documented hours experience applying protective coatings with airless spray.

*Students without the 800 hours of spraying experience are allowed to take the C12 training and exams, but won't be certified and can only work under supervision of an individual with a C12 certification.

Fees

Starting from A\$6,600.00.
