The train the painter program provides employers with an international benchmark for industrial blasting and coating application training accessible to a wide variety of companies worldwide.

The comprehensive theoretical and practical approach to training provides the industry with an alternative pathway to ensure employees have a tailored solution to their specific training needs.

PROTECTIVE COATING APPLICATOR

The Protective Coating Application course is the essential starting point of the Train the Painter (TTP) program and a mandatory prerequisite for all advanced TTP modules. Tailored for newcomers to the industry, this course delivers the core knowledge and practical skills needed before entering an industrial worksite.

ABRASIVE BLAST CLEANING

After completing the Protective Coating Application course, take the next step in your professional development with the Abrasive Blast Cleaning course.

Gain hands-on experience using a variety of blast media, including sandblasting, one of the most widely used methods for surface preparation across industries such as marine, mining, infrastructure, and oil & gas.

SPRAY PAINTING

The Spray Painting course is the ideal progression from the Protective Coating Application module. Designed to build on foundational skills, this course enhances students technical knowledge and practical abilities—preparing students for specialised roles in the growing protective coatings industry.

TRAIN THE PAINTER

APPROVED TRAINING PROVIDER

The Corrodere Academy is dedicated to raising professional standards across the coatings industry worldwide. By offering expert-led training, The Academy makes high-quality education accessible to coating inspectors and industry professionals across the globe.

ICORR COATING INSPECTION LEVEL 1

Our flexible and online ICorr Level 1 Coating Inspector course is designed to prepare candidates for the official ICorr Level 1 practical examination. Ideal for professionals with at least 12 months of industry experience, this program is accessible worldwide and includes a dedicated module on Marine and Offshore Coatings.

ICORR COATING INSPECTION LEVEL 2

The ICorr Level 2 Coating Inspector course is tailored for experienced professionals looking to take the next step in their inspection career. This advanced training equips inspectors with the technical knowledge and practical skills needed to oversee surface preparation and coating processes with confidence and competence.

ICORR COATING INSPECTION LEVEL 3

The ICorr Level 3 Coating Inspector course is the highest level of certification in the ICorr inspection pathway. This program is designed for experienced inspectors seeking to deepen their expertise in advanced surface treatment methods, corrosion prevention, health and safety, and comprehensive inspection techniques.

COATING INSPECTION PROGRAMS

At JMK Training, we go beyond traditional training programs to offer a full suite of services that support your workforce from verifying employees skills to creating custom eLearning modules.

Our additional services are designed to ensure quality, compliance, and performance across every level of your operations

COATING INSPECTION SERVICES

Our certified inspectors use advanced testing methods and industry-best practices to ensure coatings perform as intended, reducing the risk of premature failures, costly repairs, and safety hazards. By choosing our Coating Inspection Services, you are investing in quality assurance, asset longevity, and regulatory compliance.

CUSTOMIZED ELEARNING MODULES

JMK Training designs custom eLearning modules tailored to your operations.

These interactive, multimedia-rich courses are ideal for onboarding, compliance training, or technical skills reinforcement.

Accessible anytime, anywhere

VERIFICATION OF SKILLS

Our Verification of Skills service provides structured evaluations to confirm your team's practical competencies against industry benchmarks. This ensures that only qualified individuals are deployed on critical tasks and projects—reducing risk, rework, and downtime.
